---

## Summary

Aspiring Software Engineer with hands-on experience in **backend** and **web application development** using **Java (Spring)**, **RESTful APIs** and **PostgreSQL**. Strong understanding of data structures, OOP and client-server architecture. Experienced in building scalable APIs, integrating frontend applications and working with **SQL and NoSQL databases**.

---

## Education

**Master of Science in Computer Science. CGPA: 7.8.** St. Xavier's College, Palayamkottai. Graduation Year: **2026**.

**Bachelor of Science in Computer Science. CGPA: 6.8.** St. Xavier's College, Palayamkottai. Graduated Year: **2023**.

---

## Skills

- **Programming Language:** Java, JavaScript, Python
- **Backend:** Spring Boot, spring MVC, Spring Data JPA, REST, Hibernate ORM, Gradle, JUnit 5
- **Frontend:** React, Redux Toolkit, Context API, Tailwind CSS, Vite, npm, yarn
- **Databases:** PostgreSQL, MySQL and MongoDB.
- **System Design:** MVC, Microservices, Monolith, Event Driven, JWT, Redis.
- **Tools & DevOps:** Git, GitHub, Docker, Kubernetes, AWS.

---

## Experience

### Python Fullstack Intern | Team Infosoft Tirunelveli | Summer Internship

- Contributed to backend development of a Library Management System during a 35-day internship.
- Worked with database operations involving 5+ relational tables for book and user management.
- Assisted in developing and testing backend functionalities for efficient record handling.
- Applied full-stack development concepts and industry best practices in a real-world project.

---

## Projects:

### Secure API Gateway for Microservices Architecture – Spring Boot, JWT, REST, PostgreSQL

- Architected a scalable full-stack microservices ecosystem, utilizing an API Gateway to securely route requests from a client frontend to 20+ backend REST endpoints across multiple services.
- Engineered a robust security layer using JWT and Role-Based Access Control (RBAC) to enforce strict identity management, achieving 100% secure API access and role-level authorization for authenticated users.
- Optimized client-to-backend communication by designing a centralized routing layer with request filtering and token-bucket rate limiting; and boosted request handling efficiency by ~30% under concurrent loads.
- Developed a highly adaptable, domain-agnostic architecture driven by dynamic configuration, allowing the infrastructure to seamlessly pivot between Healthcare, E-commerce, and Enterprise application environments with required configurations.

### E-Learning Platform | React, Django, PostgreSQL

- Developed a full-stack e-learning platform supporting 3 user roles (Admin, Instructor, Student).
- Designed and integrated 10+ REST APIs for authentication, course management, and enrollment.
- Built a PostgreSQL database with 6+ normalized tables for users, courses, enrollments, and progress tracking.
- Implemented JWT-based authentication and role-based authorization for secure access control.

---

## CERTIFICATION & ASSESSMENTS

- **NPTEL** – Python for Data Science (Elite Certification)
- **LearnTubeAI** - Java Assessment Certification
- **TCS National Qualifier Test (NQT) – Validity : 14/04/2026 - 14/04/2028 – Score: 71.99 %**
- **Udemy**– Spring Boot 4, Spring 7 & Hibernate for Beginners by Chad Darby
